

Excellence in Manufacturing

Proudly sponsored by

Limit: 500 words and no more than 2 pages of supporting information.

The judges will make the award to the organisation that best demonstrates adoption of continuous improvement tools/practise in their business, with a particular focus on the development and manufacture of a product and the successful transition from product development to market.

Category Specific

- Describe how the organisation has demonstrated innovation and flair in manufacturing.
- How does the company develop new or improve current manufacturing processes? Eg quality systems, in-house quality programmes, client feedback (formal and informal).
- What key processes are involved and how are these designed and implemented?
- What technology has been developed by the company to assist in these processes?
- What benefits has the company experienced?
- Demonstrate the way the business identifies and responds to customers and market needs.
